IDSS ISUZU DIAGNOSTIC SERVICE SYSTEM®

General:

Isuzu Diagnostic Service System IDSS is a dealer level PC based system that provides complete diagnostic and service information to any shop at dealer level.

When combined with the correct software, the IDSS offers complete diagnostic and programming capabilities on all Isuzu trucks.

IDSS Software Includes:

- Service information (including Electrical Troubleshooting Manual)
- Scan Tool
- Service Programming
- Bulletins
- Some training to support all Isuzu manufactured products

The IDSS software is designed for use with the IDSS Interface module.

Supported Vehicles:

IDSS supports only U.S. or Canadian specification Isuzu vehicles from 2005 to current. Models covered are: C, F, H, N, T & W

Kit Includes:

IDSS Interface Module Kit includes:

- 1 IDSS Interface module
- 1 USB cable
- 1 DLC cable
- 1 IDSS Installation CD
- Support desk technical support
- 6 month IDSS subscription (Can be renewed after that)

ISUZU TRUCK

IDSS Subscription:

An IDSS subscription enables you to register your product and receive periodic web updates through the Internet to update your Interface module with new models, functionality and programming capabilities
